Chapter 28  
*Vibrio, Aeromonas, Plesiomonas, and Chromobacterium, 371*

- General Characteristics, 371
- Epidemiology, 371
- Pathogenesis and Spectrum of Disease, 371
- Laboratory Diagnosis, 373
- Antimicrobial Susceptibility Testing and Therapy, 378
- Prevention, 378

**SECTION 9:**  
**GRAM-NEGATIVE BACILLI AND COCCOBACILLI (MACCONKEY-NEGATIVE, OXIDASE-POSITIVE)**

Chapter 29  
*Sphingomonas paucimobilis and Similar Organisms, 380*

- General Considerations, 380
- Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 380
- Laboratory Diagnosis, 380
- Prevention, 382

Chapter 30  
*Moraxella, 384*

- General Characteristics, 384
- Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 384
- Laboratory Diagnosis, 384
- Prevention, 387

Chapter 31  
*Eikenella and Similar Organisms, 389*

- General Characteristics, 389
- Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 389
- Laboratory Diagnosis, 389
- Prevention, 392

Chapter 32  
*Pasteurella and Similar Organisms, 393*

- General Characteristics, 393
- Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 393
- Laboratory Diagnosis, 393
- Prevention, 396

Chapter 33  
*Actinobacillus, Kingella, Cardiobacterium, Capnocytophaga, and Similar Organisms, 397*

- General Characteristics, 397
- Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 397

**SECTION 10:**  
**GRAM-NEGATIVE BACILLI AND COCCOBACILLI (MACCONKEY-NEGATIVE, OXIDASE-NEGATIVE)**

Chapter 34  
*Haemophilus, 403*

- General Characteristics, 403
- Epidemiology, 403
- Pathogenesis and Spectrum of Disease, 403
- Laboratory Diagnosis, 403
- Antimicrobial Susceptibility Testing and Therapy, 407
- Prevention, 409

**SECTION 11:**  
**GRAM-NEGATIVE BACILLI THAT ARE OPTIMALLY RECOVERED ON SPECIAL MEDIA**

Chapter 35  
*Bartonella and Afipia, 410*

- Bartonella, 410
- Afipia felis, 414

Chapter 36  
*Campylobacter, Arcobacter, and Helicobacter, 416*

- Campylobacter and Arcobacter, 416
- Helicobacter, 421

Chapter 37  
*Legionella, 424*

- General Characteristics, 424
- Epidemiology and Pathogenesis, 424
- Spectrum of Disease, 425
- Laboratory Diagnosis, 426
- Antimicrobial Susceptibility Testing and Therapy, 428
- Prevention, 428

Chapter 38  
*Brucella, 430*

- General Characteristics, 430
- Epidemiology and Pathogenesis, 430
- Spectrum of Disease, 431
- Laboratory Diagnosis, 431
- Antimicrobial Susceptibility Testing and Therapy, 433
- Prevention, 433
Chapter 39  
**Bordetella pertussis and Bordetella parapertussis, 435**
- General Characteristics, 435
- Epidemiology and
- Pathogenesis, 435
- Spectrum of Disease, 435
- Laboratory Diagnosis, 436
- Antimicrobial Susceptibility
- Testing and Therapy, 438
- Prevention, 438

Chapter 40  
**Francisella, 440**
- General Characteristics, 440
- Epidemiology and
- Pathogenesis, 440
- Spectrum of Disease, 440
- Laboratory Diagnosis, 440
- Antimicrobial Susceptibility
- Testing and Therapy, 442
- Prevention, 442

Chapter 41  
**Streptobacillus moniliformis and Spirillum minus, 444**
- *Streptobacillus moniliformis, 444*
- *Spirillum minus, 445*

Section 12: Gram-Negative Cocci

Chapter 42  
**Neisseria and Moraxella catarrhalis, 447**
- General Characteristics, 447
- Epidemiology, 447
- Pathogenesis and Spectrum of Disease, 447
- Laboratory Diagnosis, 447
- Antimicrobial Susceptibility
- Testing and Therapy, 452
- Prevention, 452

Section 13: Anaerobic Bacteriology

Chapter 43  
**Overview and General Considerations, 455**
- General Characteristics, 455
- Epidemiology, 455
- Pathogenesis and Spectrum of Disease, 456
- Specimen Collection and Transport, 457
- Anaerobic Media, 459
- Prevention, 461

Chapter 44  
**Laboratory Considerations, 463**
- Macroscopic Examination of Specimens, 463
- Direct Detection Methods, 463
- Cultivation, 463
- Approach to Identification, 466
- Antimicrobial Susceptibility
- Testing and Therapy, 476

Section 14: Mycobacteria and Other Bacteria with Unusual Growth Requirements

Chapter 45  
**Mycobacteria, 478**
- *Mycobacterium tuberculosis*
- Complex, 478
- Nontuberculosis
- Mycobacteria, 481
- Laboratory Diagnosis of Mycobacterial Infections, 486
- Antimicrobial Susceptibility
- Testing and Therapy, 505
- Prevention, 508

Chapter 46  
**Obligate Intracellular and Nonculturable Bacterial Agents, 510**
- *Chlamydia, 510*
- *Rickettsia, Orientia, Anaplasma, and Ehrlichia, 518*
- *Coxiella, 521*
- *Tropheryma whippelii, 522*
- *Calymmatobacterium granulomatis, 522*

Chapter 47  
**Cell Wall–Deficient Bacteria: Mycoplasma and Ureaplasma, 525**
- General Characteristics, 525
- Epidemiology and
- Pathogenesis, 525
- Spectrum of Disease, 526
- Laboratory Diagnosis, 526
- Susceptibility Testing and Therapy, 529
- Prevention, 532

Chapter 48  
**The Spirochetes, 533**
- *Treponema, 533*
- *Borrelia, 536*
- *Leptospira, 539*
PART IV
Parasitology

Chapter 49 Laboratory Methods for Diagnosis of Parasitic Infections, 543
General Characteristics, 544
Epidemiology, 544
Pathogenesis and Spectrum of Disease, 547
Laboratory Diagnosis, 558
Approach to Identification, 564
Organism Identification, 578
Antimicrobial Susceptibility Testing and Therapy, 613
Prevention, 613

PART V
Mycology

Chapter 50 Laboratory Methods in Basic Mycology, 629
Overview of Clinical Mycology, 629
General Features of the Fungi, 629
Taxonomy of the Fungi, 632
Practical Classification of the Fungi, 634
Virulence Factors of the Medically Important Fungi, 636
General Considerations for the Laboratory Diagnosis of Fungal Infections, 642
Extent of Identification of Fungi Recovered from Clinical Specimens, 645
General Considerations for the Identification of molds, 653
General Morphologic Features of the Molds, 657
Hyaline, Pauciseptate Molds: The Zygomyctes, 660
Hyaline, Septate, Monomorphic Molds: The Dermatophytes, 662
Hyaline, Septate, Monomorphic Molds: The Opportunistic Mycoses, 669
Hyaline, Septate, Dimorphic Molds: Systemic Mycoses, 674
Septate, Dematiaceous Molds, 683
Pneumocystis jiroveci (an Atypical Fungus), 695

PART VI
Virology

Chapter 51 Laboratory Methods in Basic Virology, 718
General Characteristics, 718
Viruses That Cause Human Diseases, 721
Laboratory Diagnosis of Viral Infection, 735
Prevention of Viral Infection, 767

PART VII
Diagnosis by Organ System

Chapter 52 Bloodstream Infections, 778
General Considerations, 778
Detection of Bacteremia, 784
Special Considerations for Other Relevant Organisms Isolated from Blood, 794

Chapter 53 Infections of the Lower Respiratory Tract, 798
General Considerations, 798
Diseases of the Lower Respiratory Tract, 801
Laboratory Diagnosis of Lower Respiratory Tract Infections, 807

Chapter 54 Upper Respiratory Tract Infections and Other Infections of the Oral Cavity and Neck, 814
Diseases of the Upper Respiratory Tract, Oral Cavity, and Neck, 814

The Yeasts, 696
Commercially Available Yeast Identification Systems, 702
Conventional Yeast Identification Methods, 703
Antimicrobial Susceptibility Testing and Therapy, 704
Antifungal Susceptibility Testing, 709
Diagnosis of Upper Respiratory Tract Infections, 818
Diagnosis of Infections in the Oral Cavity and Neck, 820

Chapter 55 Meningitis and Other Infections of the Central Nervous System, 822
General Considerations, 822
Laboratory Diagnosis of Central Nervous System Infections, 827

Chapter 56 Infections of the Eyes, Ears, and Sinuses, 832
Eyes, 832
Ears, 837
Sinuses, 839

Chapter 57 Infections of the Urinary Tract, 842
General Considerations, 842
Infections of the Urinary Tract, 842
Laboratory Diagnosis of Urinary Tract Infections, 846

Chapter 58 Genital Tract Infections, 856
General Considerations, 856
Genital Tract Infections, 856
Laboratory Diagnosis of Genital Tract Infections, 863

Chapter 59 Gastrointestinal Tract Infections, 873
General Considerations, 873
Gastroenteritis, 873
Other Infections of the Gastrointestinal Tract, 883
Laboratory Diagnosis of Gastrointestinal Tract Infections, 885

Chapter 60 Skin, Soft Tissue, and Wound Infections, 891
General Considerations, 891
Skin and Soft Tissue Infections, 891
Laboratory Diagnostic Procedures, 900

Chapter 61 Normally Sterile Body Fluids, Bone and Bone Marrow, and Solid Tissues, 904
Specimens from Sterile Body Sites, 904
Laboratory Diagnostic Procedures, 909

PART VIII Clinical Laboratory Management

Chapter 62 Laboratory Physical Design, Management, and Organization, 915
Space Requirements and Organization of Work Flow, 915
Regulation of the Microbiology Laboratory, 918
Selection of Diagnostic Tests, 921
Cost Accounting, 924
Budgeting, 926
Inventory Control, 926
Interviewing and Hiring Employees, 927
Organization of the Microbiology Laboratory, 928
Design of Laboratory Handbook for Clinical Staff, 929
Design of Laboratory Requisition Form, 929
Design of Laboratory Workcard, 930
Design of Laboratory Report Form, 930
Writing a Procedure Manual, 930
Production of Statistical Reports, 932

Chapter 63 Quality in the Clinical Microbiology Laboratory, 934
QC Program, 934
Specimen Collection and Transport, 934
Standard Operating Procedure Manual (SOPM), 935
Personnel, 935
Reference Laboratories, 935
Patient Reports, 935
Proficiency Testing (PT), 935
Performance Checks, 938
Antimicrobial Susceptibility Tests, 938
Maintenance of QC Records, 939
Maintenance of Reference QC Stocks, 939
QA Program, 940
Q-Probes, 940
In-House QA Audits, 940
Conducting a QA Audit, 943
Continuous Daily Monitoring, 943
Chapter 64  Infection Control, 945

Incidence of Nosocomial Infections, 945
Types of Nosocomial Infections, 945
Emergence of Antibiotic-Resistant Microorganisms, 946
Hospital Infection Control Programs, 947
Role of the Microbiology Laboratory, 947
Characterizing Strains Involved in an Outbreak, 948
Preventing Nosocomial Infections, 948
Surveillance Cultures, 950

Chapter 65  Sentinel Laboratory Response to Bioterrorism, 953

General Considerations, 953
Government Laws and Regulations, 953
Laboratory Response Network, 954

Appendix: Answers to Case Studies, 958

Glossary, 973
Diagnostic Microbiology and Infectious Disease keeps you informed of the latest developments in clinical microbiology and the diagnosis and treatment of infectious diseases. Packed with rigorously peer-reviewed articles and studies in bacteriology, immunology, immunoserology, infectious diseases, mycology, parasitology, and virology. The journal examines new procedures, unusual cases, controversial issues, and important new literature. Diagnostic microbiology concentrates on the laboratory analysis of clinical specimens in cases when an infectious disease is suspected. The diagnosis of staphylococcal infections may involve clinical specimens isolated from humans, animals, or food products, as well as samples collected from the environment. Hetika Kotecha, Preethi B. Poduval, in Advances in Biological Science Research, 2019. 9.3.1 Lectins in diagnostics. In diagnostic microbiology, lectins can be used
