Ethical decision-making refers to the process of evaluating and choosing among alternatives in a manner consistent with ethical principles. In making ethical decisions, it is necessary to perceive and eliminate unethical options and select the best ethical alternative. The process of making ethical decisions requires: Commitment: The desire to do the right thing regardless of the cost. Consciousness: The awareness to act consistently and apply moral convictions to daily behavior. These behaviors provide a foundation for making better decisions by setting the ground rules for our behavior. Effective decisions are effective if they accomplish what we want accomplished and if they advance our purposes. A choice that produces unintended and undesirable results is ineffective.
