Bovine Mastitis.
This text addresses the most common clinical procedures in veterinary practice used with horses, cattle, llamas, goats, and pigs; with primary emphasis placed on horses and cattle. The purpose, potential complications, and a detailed equipment list are provided for every procedure. In addition to listing the technical steps of each procedure, this text includes a rationale column which explains, amplifies and provides additional insight concerning each step. This is an ideal reference for students in veterinary technology and the only step-by-step large animal clinical procedures text available today. Veterinary technician students, veterinary technician educators, and veterinary technicians in practice who wish to foster and expand their knowledge of large animal medicine will find Large Animal Medicine for Veterinary Technicians an invaluable resource.
