TAP ROOTS (SMTIH) (M) -- Beginning with a revival-esque introduction, this down-home, 'foot-stompin', toe-tappin' original will be the hit of your concert. Premiered at the 2004 Midwest Band & Orchestra Clinic, it features a solo spoon part that was performed by the composer himself. You can certainly perform it without, but it definitely adds to the energy. ............................. #30687

In contrast, the major key's passage should be played with all the joy and happiness your group can muster. Carefully following dynamic indications and changes will help build the appropriate tension and release to keep your audience on the edge of their seats. Brian West captures all of the anticipation, excitement, and delights of this unusual custom. #45534

VARIATIONS ON A THEME OF ERIC SATIE (SATIE/BROEGE) (E) -- French composer Eric Satie was a master at creating beautiful but important musical figures in early 20th century music. These variations are based on the melody found in the first movement of his Peacetudes Importunes (Annoying Offenses) of 1913. The variations expand upon various rhythmical and melodic aspects of the theme, while broadening the limited harmonic vocabulary of the original. Broege's variations shed a very imaginative light on Satie's original theme, and present a musical journey sure to enlighten and enhance the musicality of any orchestra. ............................. #60508
